vletInitializer extends
AbstractDispatcherServletInit
ializer {
    getRootConfigClasses() {}
    getServletConfigClasses(){}
    getServletMappings() {}
}
```

JAVA JAVA
RootConfig   WebConfig

HandlerMapping
ParameterizableViewController
InternalResourceViewResolver

Configurer(classes)
Template Method design pattern

```
interface WebMvcConfigurer {
    void addViewControllers(ViewControllerRegistry);
    void configurerViewResolvers(ViewResolverRegistry);
    void addResourceHandlers(ResourceHandlerRegistry);
}
```

```
@Configuration
class MyWebMvcConfigurer implements WebMvcConfigurer {

    void addViewControllers(ViewControllerRegistry registry) {
        registry.addViewController("/home.htm").setViewName("home");
    }
}
```

HandlerMapping   = registry builders   Spring Security
HandlerInterceptors   1. AuthenticationManager
ViewResolvers   2. AuthenticationProvider
ViewControllers   3. HttpConfigurer
MessageConverters
Formatters   #java configuration
ResourceHandlers   registry (builder)
etc

```
@Configuration
@EnableWebMvc
class MyWebMvcConfigurer implements WebMvcConfigurer {

    public void addViewControllers(ViewControllerRegistry registry) {
        registry.addViewController("/privacy-
policy.htm").setViewName("privacy-policy");
    }

    public void configureViewResolvers(ViewResolverRegistry registry) {
        registry.jsp("/WEB-INF/jsp/", ".jsp");
    }
}
```
